# FLUTTER FRAMEWORK

## Keep fluttering...

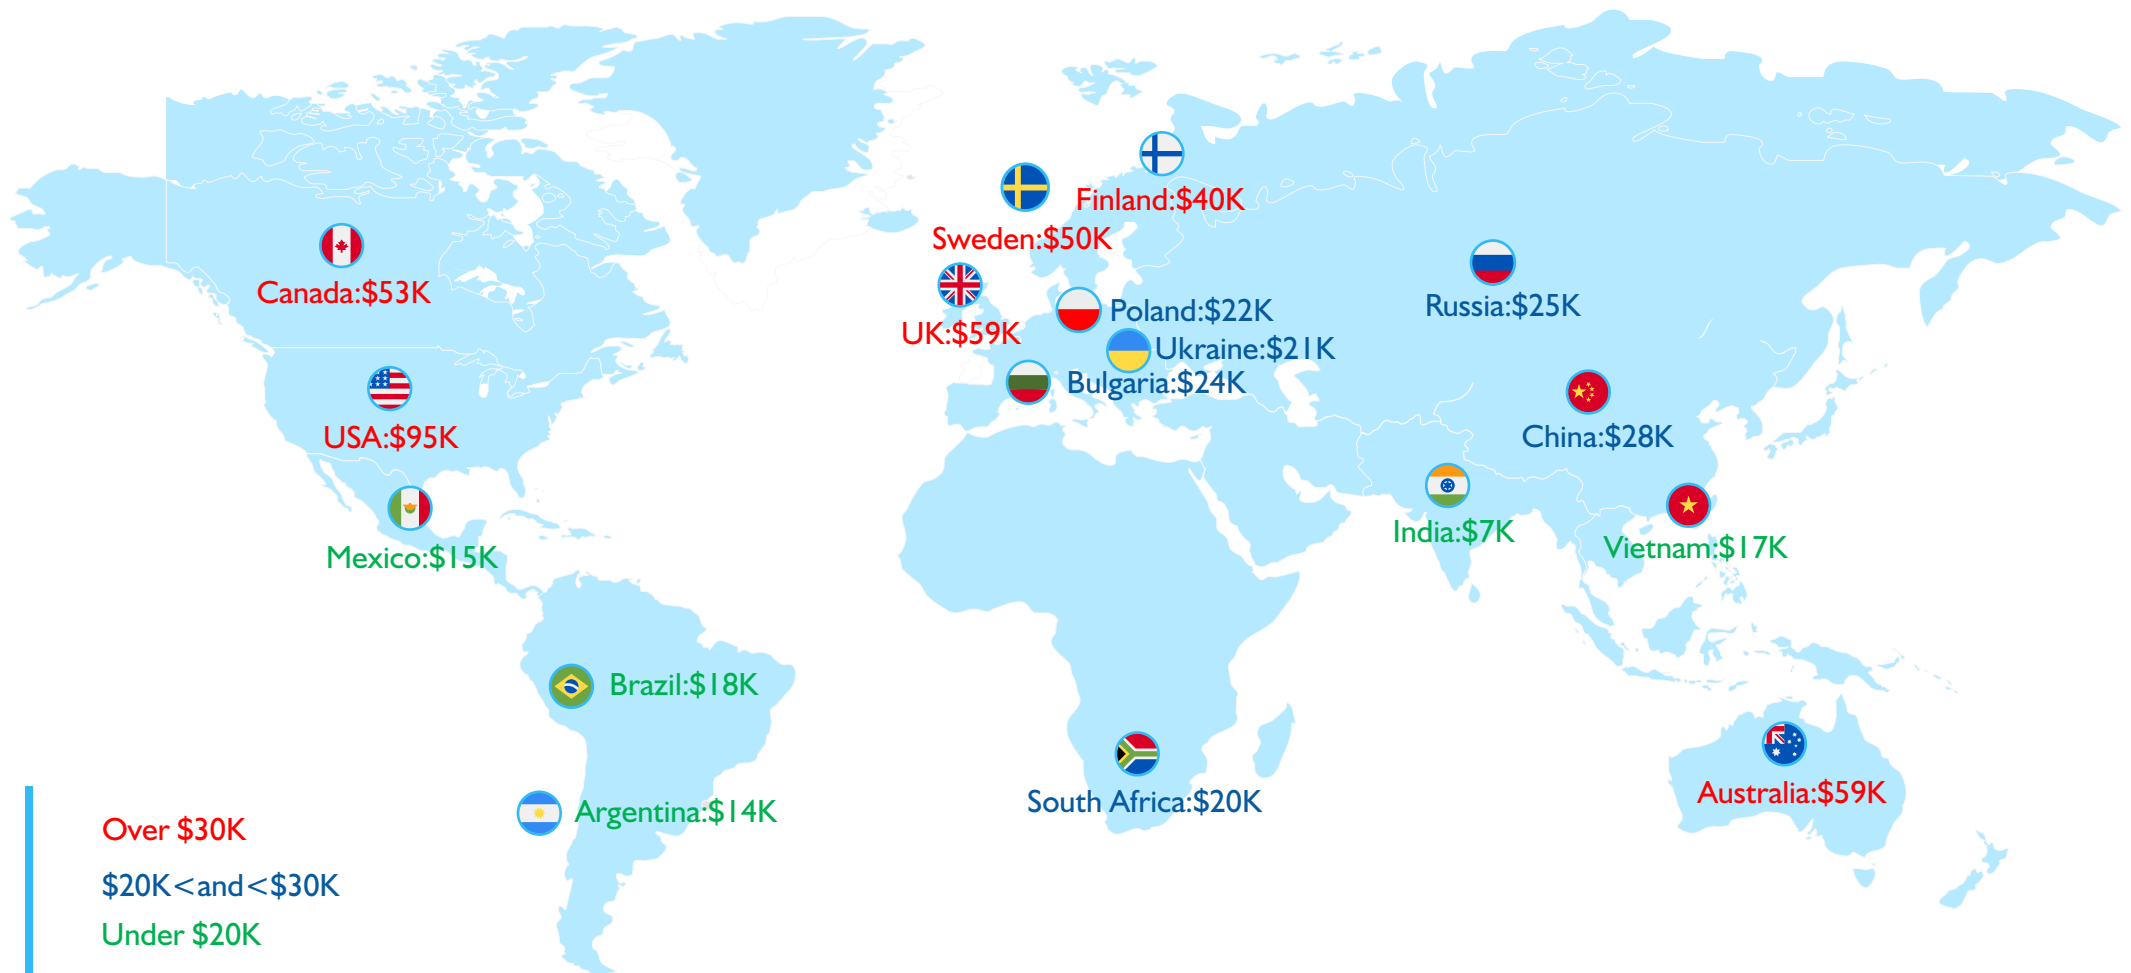

Flutter is a rapidly developing framework supported by Google Inc. Flutter developers community is growing quickly and you can measure it by the number of modules developed over the last years. The overall trend is exponential. Therefore flutter developers market is growing alone. Our team is working on the Open-Source project to create E-commerce App for small and medium businesses using the Flutter framework.

A few words about methodology. The data was collected from open information available on headhunting and recruiting websites and our applications done by flutter developers from our open-source community.

This report done in March 2020 to provide an overview of salaries for Flutter developers all over the world an help young professionals choose the career they deserve.
